

# Brains, Birds, and Elephants

Normally, we use pounds, grams and kilograms to measure weight. But normal is booooo-ring!  
What is an elephant's weight in brains? What is a brain's weight in robins? Let's find out!

## First, the basics:

A robin weighs about 77 grams.

An adult human brain weighs about 1,400 grams.

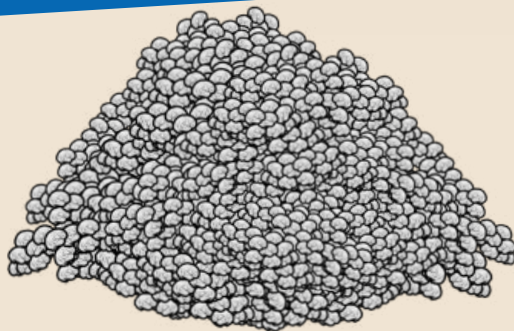

African elephants weigh up to 6,000 kilograms.  
(That's 6,000,000 grams!)

### What a bird brain!

One human brain weighs as much as \_\_\_\_\_ robins!

### Tonnes of fun!

One elephant weighs as much as \_\_\_\_\_ human brains!

What is an elephant's weight in robins?

### How many hummingbirds in...

**BONUS!  
BONUS!**

This ruby-throated hummingbird weighs just THREE grams!

ONE brain?

THREE robins?

TWO elephants?
