

FOR IMMEDIATE RELEASE

Brain Tumour Foundation of Canada launches a new mobile app

London, ON – April 20, 2022 – Brain Tumour Foundation of Canada is proud to launch a new bilingual and accessible mobile app, as a new way for members of the brain tumour community to connect, and to access support and resources. The mobile app is free to download and is available on the iOS and Google Play stores. Brain Tumour Foundation of Canada’s app has been made possible thanks to funding from The Adam Fanaki Brain Fund.

“Having access to an app such as this one will help patients living with a brain tumour and their caregivers everywhere,” says Janet Fanaki, Founder of The Adam Fanaki Brain Fund. *“My children and I are very proud to have partnered with Brain Tumour Foundation of Canada to help make it happen.”*

Users can now access the organization’s brain tumour patient and caregiver handbooks directly on their phones, from anywhere and at any time. The app also features detailed information sheets, pediatric resources, latest news and more. The support chat allows members of the brain tumour community to share advice and support each other throughout their journey. Additional features for the app will also be announced in the coming weeks.

The app can be downloaded with a QR code attached at the end of this press release, or on the Brain Tumour Foundation of Canada’s website: www.braintumour.ca/app.

About Brain Tumour Foundation of Canada: Brain Tumour Foundation of Canada is the only national charity offering information and support to patients affected by any brain tumour – cancerous, non-malignant or metastases. The organization funds ground-breaking research across North America and, since 1982, has dedicated over \$8.9 million to finding a cure and improving treatment for brain tumour survivors. Brain Tumour Foundation of Canada is funded solely through generous contributions from individuals, corporations, organizations, employee groups and special events. Learn more at www.braintumour.ca.
