MAKING EVERY BRAIN TUMOUR COUNT!

27/day
In 2021 it is estimated that there will be 27 new primary brain tumours diagnosed every day in Canada.

64% Non-Malignant
Non-malignant tumours account for almost two-thirds of all primary brain tumours.

23.5 /100,000/year
23.5 new cases of primary brain tumours were estimated per 100,000 population per year (AB, BC, MB, ON).

Incident Rates Increase with Age
Note incidence trends as related to age vary for tumour histology.

Males and Females
Glioblastoma is the most common primary brain tumour in men (5.1/100,000).
Meningioma is the most common primary brain tumour in women (7.6/100,000).

0-4 Year Olds
Embryonal tumours are the most common brain tumour at this age.

5-14 Year Olds
Pilocytic astrocytoma is the most common brain tumour at this age.
